

Case Type Key

Case Type	Description
Adoptive Home	This case type is used to document those cases in which an adoption has finalized.
Child Welfare	This Case Type would be used to document those cases in which there are no specific allegations of abuse or neglect but there is some service being provided to the child or family.
Courtesy Interview	<p>This Case Type would be used if the case had been created for the simple purposes of documenting a courtesy interview between departments, agencies, or counties.</p> <p>Note: Beginning November 1st, 2005 this case type will only be valid for out-of-state requests.</p>
CPS Family	This Case Type is used to denote a case where abuse and or neglect has been alleged. This case type is very broad and is used to document intra familial/primary caregiver abuse or neglect as well as non-intra familial/secondary caregiver abuse or neglect.
CPS-DCFS Lic/Cert Provider	This Case Type is selected when the alleged abuse and or neglect are directed toward a licensed or certified provider (ie. Foster Home, Day Care Provider etc.).
CPS – Other	This Case Type should be used in situations where the referrals that make up the case needed to be assessed by CPS, but are not abuse or neglect (e.g; lack of necessary care due to poverty, parental failure to provide necessary medical care for religious reasons, relinquished infants, self-inflicted injury, etc.).
Guardianship	If the case has been created specifically to represent an issue surrounding Guardianship this Case Type would be used. An instance of this could be where the child's only parent dies and a grandparent is applying for guardianship and the department or agency is assisting.
ICPC	Counties use this Case Type to represent cases where the request for services is coming from another state. If the request is coming from Wisconsin the case will be defined with a CPS Family, Child Welfare or one of the other descriptive Case Types. Some counties refer to these case types as interstate compacts.
Intra State	No longer in use. This case type will be removed in a future release.
Juv. Justice	This Case Type will satisfy both Delinquency Cases and JIPS Cases. This is handled in this manner because when a case is created one may not know that a case is going to be Delinquency related or JIPS. Currently, if the case has both CPS Family concerns and Juvenile Court issues, the CPS Family Case Type will most likely take precedence.
Kinship Care	Any non court ordered (voluntary) Kinship case, or court ordered Kinship case that does not carry CPS Family concerns will use this Case Type.

	Currently, if the case has both CPS Family concerns and Kinship, the CPS Family Case Type will most likely take precedence.
Pre-Adoptive Child	This Case Type applies to those child cases that originate from a TPR. This is the case created when a child is deactivated from their CPS Family case for reasons of TPR. The State Adoptions Unit uses this case to document their case management work between the TPR and the finalization of the adoption.
Subsidized Guardianship	This case type is system generated and applies to those cases created when a child is deactivated for reasons of "Subsidized Guardianship".
